## EDUCATION

**University of South Florida** | (USF) | Tampa, FL

June 2021 – May 2025

Bachelor of Science in Information Science | **GPA: 3.77**

**Specialized Courses:** Advanced Statistics & Analytics, Discrete Math, Calculus, Visual Analytics, Data & Text Mining, Predictive Analytics, Computer Security Policies, Information Policy & Ethics, IT Concepts for Information Professionals, Interaction Design, Information Behaviors, Database Concepts, R Programming, C++ Programming, Java Programming

## EXPERIENCE

**Properties Management Assistant** | Marger Properties | St. Petersburg, FL

July 2019 – December 2024

- Coordinated with contractors and tenants on projects, improving information accuracy by around 12%
- Drove down expenses by over 10% through strategic optimization of property upkeep, repair, and replacement

**Office Complex Assistant** | Palais Royale Offices | St. Petersburg, FL

June 2019 – December 2024

- Reorganized new data on files by developing a new label-sorting system
- Led the design of a more effective operation framework, boosting overall tenant satisfaction by 15%

## SKILLS

**Programming:** Python, C++, Java, R, SQL, HTML, CSS

**Tools:** Spyder, Visual Studio, NetBeans, RStudio, Microsoft Access, Tableau, ArcGIS, Canvas, Microsoft Office Suite (Word, Excel, PowerPoint, Outlook, Teams)

## COMMUNITY INVOLVEMENT

**Student Support Services** | (SSS) | University of South Florida | Tampa, FL

June 2021 – May 2025

- Assisted in events, workshops, and activities aimed at supporting low-income, first-generation students to succeed

**Volunteering** | St. Vincent de Paul CARES | St. Petersburg, FL

January 2019 – December 2020

- Supported my local nonprofit organization, which is committed to ending homelessness through hands-on assistance

## KEY PROJECTS

**(C++)** | Cash Register | Card Trick

- Implemented a case-based loop to calculate subtotals, taxes, and total sales, based on sales per transaction
- Created an interactive card game that used algorithms, manipulated arrays, and loops to simulate a seamless experience

**(Java)** | Calculator | Storm Tracker

- Designed a graphic user interface (GUI) calculator, enhancing users' experience through intuitive design
- Developed a program that uses real-world hurricane data to retrieve important information

**(R)** | DataMart | Airline Tweets

- Performed predictive modeling on Walmart data, extracting valuable information about future purchasing behavior
- Transformed raw airline tweet data into intuitive and powerful visuals that uncover deep insights and analysis

**(SQL)** | Doctors Office Database | Student Data Relationships

- Built a database system for a country's doctors' office, determining frequency, service, schedule, and supplier
- Managed relationships between student data, courses, and schedules, allowing optimal storage and retrieval
